<b>REAL-TIME POSITION TRACKING</b>							
<b>GeoWalk™</b> Anytime-Anywhere positioning, even when GPS is not available or a document is not geolocated. (Patent pending)	✓	✓					
<b>GPS: Global Positioning Systems</b> Support for satellite GPS, A-GPS, WPS, etc. Support for geo-located DWG documents (automatically reads GPS coordinates) Specify drawing unit settings for more accurate location (enhanced GPS)	✓	✓					
<b>SPS: Sensor Positioning System</b> Uses built-in sensors, including accelerometers, gyros, and compass, to determine position and orientation. (Patent pending)	✓	✓					
<b>GeoNudge™</b> Allows you to dramatically increase the positional accuracy by moving position indicator to exact location. (Patent pending)	✓	✓					
<b>GPS/SPS View Facing Direction Option (ovoř)</b> Drawings rotate based on physical viewing direction (like car GPS)	✓	✓					
<b>DOCUMENTING FEATURES</b>							
<b>GeoMark™</b> Intelligent markers and links that are auto-located and oriented	✓	✓					
<b>Number of GeoMarks per drawing</b>	Unlimited	Unlimited					
<b>Content types include:</b> Photos Videos Audio/Dictation Text CAD drawing data	✓	✓					✓
<b>Markup layer automatically created containing GeoMarks so original file is protected and undisturbed</b>	✓	✓					
<b>GeoMark Search</b>	✓	✓					
<b>Content Manager allows you to create, name, edit, remove, and import content</b>	✓	✓					
<b>Content Viewer allows you to view and organize content for optimal reporting</b>	✓	✓					
<b>Import and Export video and photos to/from camera roll</b>	✓	✓					
<b>Skype® and FaceTime®</b> Now everyone can be present via real-time video chat with team members anywhere in the world	✓	✓					
<b>MARKUP FEATURES</b>							
<b>AutoShapes™:</b> Draw rough shapes with your fingertips and TurboSite will automatically refine to accurate: Circles Rectangles Polygons Orthogonal lines	✓	✓					
Rotate, stretch, make parallel, create rhombus, grip edit to make corners 90 degrees	✓	✓					
Ellipse grip to convert to circle or change major/minor axes	✓	✓					
Smoothly create practically any shaped revision cloud, including L-shapes	✓	✓					
<b>Redmark Tools for 2D and 3D:</b> Markup 2D and 3D objects using: Line Circle Rectangle Revision Cloud Highlighter Multiline Text (including 15 degree polar rotation for more precise placement) Rectangular multiline text box and leader Snap to Objects, Rotation (including a magenta node), and Control Points	✓	✓					2D Only
<b>Inquiry Tools:</b> Distance/Dimension (including 15 degree polar rotation) Angle Perimeter Area	✓	✓					
<b>Other Markup Highlights:</b> 3D PDF Markup Text tags for all markup objects Layer Manager - Turn layers on/off, invert layers, turn all layers on/off Layout support - View model space and paper space layouts in your drawing Create screen shots of drawings and markups	✓	✓					
<b>2D/3D VIEWING FEATURES</b>							
<b>Unique 3D Features:</b> Support for 3D PDF (USD)	✓	✓					✓
Arrows, text, dimensions, and markup objects always face forward regardless of 3D rotation ("FaceMe")	✓	✓					
Arrow leaders snap to 3D objects, allowing them to lock and orbit in 3D correctly	✓	✓					
<b>Materials Support:</b> View 3D drawing files that have materials assigned to them Includes color values, transparency, and lights	✓	✓					
<b>Viewing Features:</b> Lightning-fast 2D and 3D environment Smooth multi-touch navigation: Pan, zoom, & 3D orbit effortlessly around document A variety of visual styles include: Wireframe Hidden line X-Ray Grayscale Realistic (materials) Shaded Shaded with edges ... and more Adjust edge color range from white-gray-black Adjust x-ray transparency factor Isometric view Option to use default or model lights (if any in drawing) Option to render both inside and outside model (force two-sided rendering) Custom perspective view - View 3D models in realistic perspective angles with ability to view in human eye perspective or choose specific camera lens sizes in mm AutoCAD® SHX font support - Native SHX font support to view localized or custom SHX fonts in your drawing file TrueType font support - Improved visual fidelity with native TTF font file support to view True Type Fonts in your drawing file Supports AutoCAD linetypes - Maintain visual fidelity as intended	✓	✓					✓
<b>CUSTOMIZED USAGE</b>							
Restore saved AutoCAD views - Quickly display the best view of your design	✓	✓					
Tactile sound feedback - Sound confirmation for button and UI item selection	✓	✓					
Autosense for 2D or 3D drawings - Option to automatically set appropriate gesture navigation of a drawing or model	✓	✓					
Turn on/off 2D/3D autosense navigation - Option to use two fingers to 3D rotate/tumble or constrain orbit and/or force 2D navigation pan mode	✓	✓					
Units setting for architectural, engineering, scientific, decimal, and fractional display measurements	✓	✓					
Units setting for imperial and metric linear measurements (drawing, micro inches, thou, inches, feet, yards, miles, angstroms, nanometers, microns, millimeters, centimeters, decimeters, meters, decameters, hectometers, kilometers, gigameters, astronomical, lightyears, and parsecs)	✓	✓					
Units setting for angular measurements (degrees, degminsec, grads, and radians)	✓	✓					
Text auto-sizes based on specified percentage	✓	✓					
Unique time-savers - Able to navigate full-screen preview during file load. Cancel errant file load	✓	✓					
Control size and resolution of rich media (photos, video) saved with GeoMarks	✓	✓					
<b>No In-App Advertising</b>	✓	✓					✓
<b>REPORTS</b>							
<b>Automatic Field Report Generation</b> Immediately view and share using custom PDF reports both in print and electronically. Geodata, time, date, location, and weather conditions are automatically logged and recorded. All notes, GeoMarks, markups, pictures, videos, and audio are chronologically categorized. Table of Contents is auto-generated and page numbers are linked. Mirror the field report standardized you use today via custom report creation	✓	✓					
Immediately view and share using free TurboSite Reader	✓	✓					
Immediately view and share using any mobile or desktop browser (HTML) HTML reports include support for multiple layout sheets in DWG files	✓	✓					
<b>FILE SHARING, INTEROPERABILITY, AND LOCALIZATION</b>							
<b>Save</b>	✓						
<b>File Management:</b> Create sub-folders Cut/Copy/Paste/Rename files and folders Diagnostic for missing xref and fonts TAP (TurboApps) file format consolidates disparate file and content types and assemblies into a single, portable file to ease distribution, sharing, and archiving	✓	✓					
<b>Native Support:</b> DWG (including AutoCAD 2013) DXF DWF and DWFx (now reads larger files faster with improved visual fidelity) PDF 3D PDF (USD, including Blutbeam generated files)	✓	✓					✓
<b>Cloud Support:</b> 2CD 3DM 3DS ASAT CGM DCD DGN EPS FCW IGS OBJ PLT SAT SKP STEP STL STP TCW WRZ	✓	✓					
<b>DropBox Support</b>	✓	✓					✓
<b>Box.com Support</b> Note: Sign up with TurboSite and receive 10GB of free storage space	✓	✓					na dotaz
<b>Support for the following languages:</b> Chinese (simplified), Czech, Danish, Dutch, English, French, German, Italian, Japanese, Norwegian, Polish, Russian, Spanish, Swedish, and Turkish	✓	✓				✓	Subset
